Total marks — 70

Attempt ALL questions.

All dimensions are in mm.

All technical sketches and drawings use third angle projection.

You may use rulers, compasses or trammels for measuring.

In all questions you may use sketches and annotations to support your answer if you wish.

Write your answers clearly in the spaces provided in this booklet. Additional space for answers is provided at the end of this booklet. If you use this space you must clearly identify the question number you are attempting.

Use **blue** or **black** ink.

Before leaving the examination room you must give this booklet to the Invigilator; if you do not, you may lose all the marks for this paper.

* X 7 3 5 7 6 0 1 0 1 *

1. A CAD technician created a 3D model of the bicycle, shown below.

(a) (i) Describe, giving two reasons, how a 3D CAD model can be used to aid production.

2

(ii) Describe, giving two reasons, how the 3D CAD model can be used to support manufacture through testing.

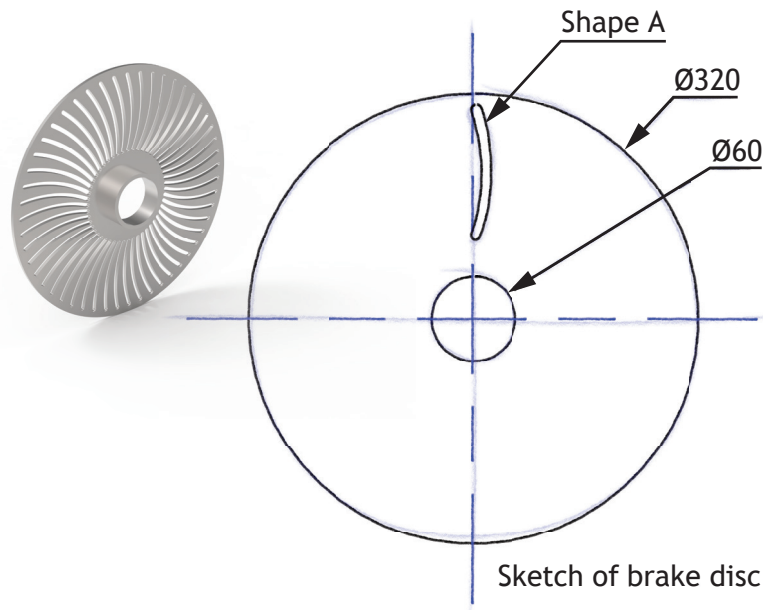

2

(c) The bicycle uses a spring as part of the suspension system, shown below.

The spring was modelled as a separate component using 3D CAD.

Describe the 3D CAD technique used to model the spring.

You must make reference to the dimensions above.

You may use sketches to illustrate your answer.

- (d) The handlebars were 3D CAD modelled as a single component. Describe the modelling technique used to generate the component. You may use sketches to illustrate your answer.

2

Rubber handles were required to cover the handlebars. The CAD technician used top down modelling to create the rubber handles.

- (e) Describe two advantages of **top down modelling** in relation to these components.

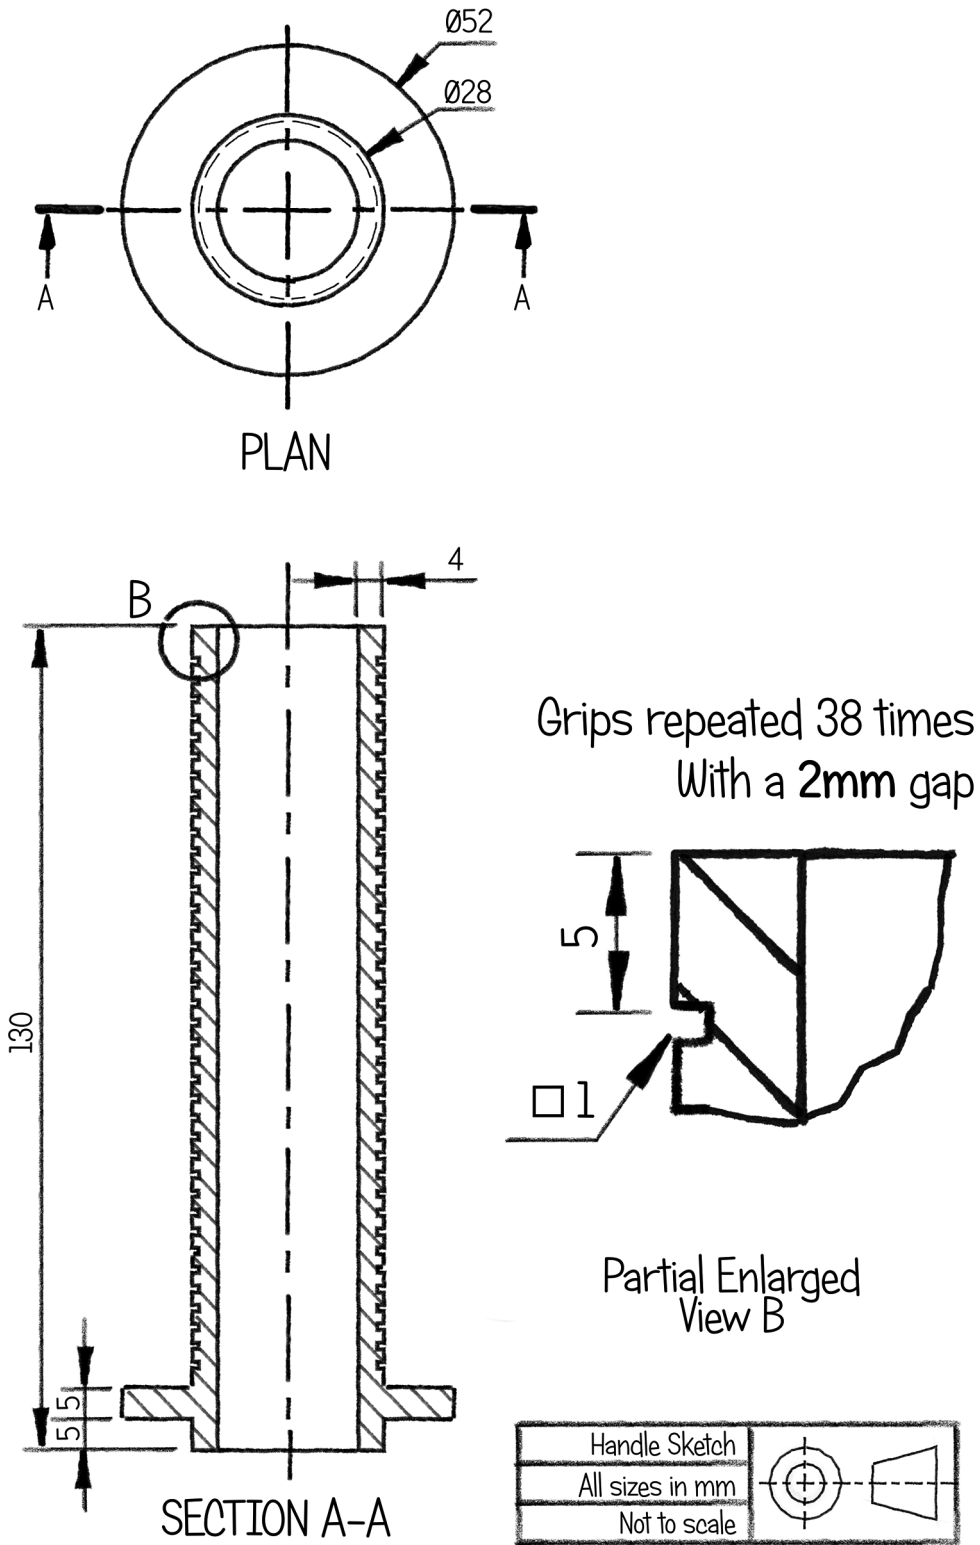

2

1. (continued)

- (f) The shape of the rubber handle was sketched prior to being modelled using 3D CAD.

The orthographic sketch of the rubber handle is shown below.

- (b) Explain, giving two reasons, why the graphic designer has limited the use of colour in the layout.

2

- (c) Describe the effect of using both serif **and** sans serif fonts in this layout.

1

- (d) The title is in a serif typeface which the graphic designer felt was suitable for use in the layout.

Explain why this is a suitable typeface for this layout.

1

- (e) Describe how the graphic designer has created **rhythm** in the layout.

1

- (f) Describe how the graphic designer has created **texture** in the layout.

1

- (g) Describe how the graphic designer has used **value** in the layout.

(b) High-resolution images used in the magazine were downloaded from a photo stock website for a small cost.

(i) Explain what is meant by the term high-resolution.

1

(ii) State the name of a suitable file type for an image.

1

(c) Prior to paying for the high-resolution images, low-resolution samples were available to download for free. These images contained watermarks, as shown above.

Explain, giving two reasons, why watermarks are added to the free images.

(b) The orthographic drawing of the packaging is shown below. The packaging will have different information on various faces.

Indicate the position of faces A–F on the surface development below.
The surface development is shown from the **outside**.

6

6. A CAD technician created a 3D model and technical drawing of an oil pump. Use the exploded view and parts list on the **Supplementary Sheet for use with Question 6**, provided, to answer this question.

SECTION A-A

- (a) Complete Section A–A above by applying hatching lines to appropriate areas in accordance to British Standard conventions. 6
- (b) Add the part number of the three components indicated on Section A–A above. 3
